HEART BEAT

Is a feature-length documentary that explores music's roots, our emotional bond to music, and its unique therapeutic qualities. Heart Beat includes dozens of inspirational and uplifting interviews with cancer survivors, crash victims, well-known DJs, musicians, and sound healers, who all testify to music's transformative healing power.

Science has now proven that certain frequencies, intentional rhythmic patterns, and music can have profound effects on our entire well-being, even at a cellular level.

Most of us enjoy music...

but have we really considered using it as a tool for stress reduction, health, and wellness?

How about music's potential to transform communities and our planet?

Something is going on...

Music festivals are popping up all over the world. It's a *trillion* dollar industry. What is the incredible attraction to these music events? Why are so many people claiming these festivals have transformed their lives?

What is the medicinal, therapeutic and communal value of music?

Is it possible music plays a much bigger role in our lives and universe than we understand?

Heart Beat explores these questions and more.

MUSIC

The Universal Language

Why do we connect with music so deeply?

Why does music bond so many different races, religions, and cultures together?

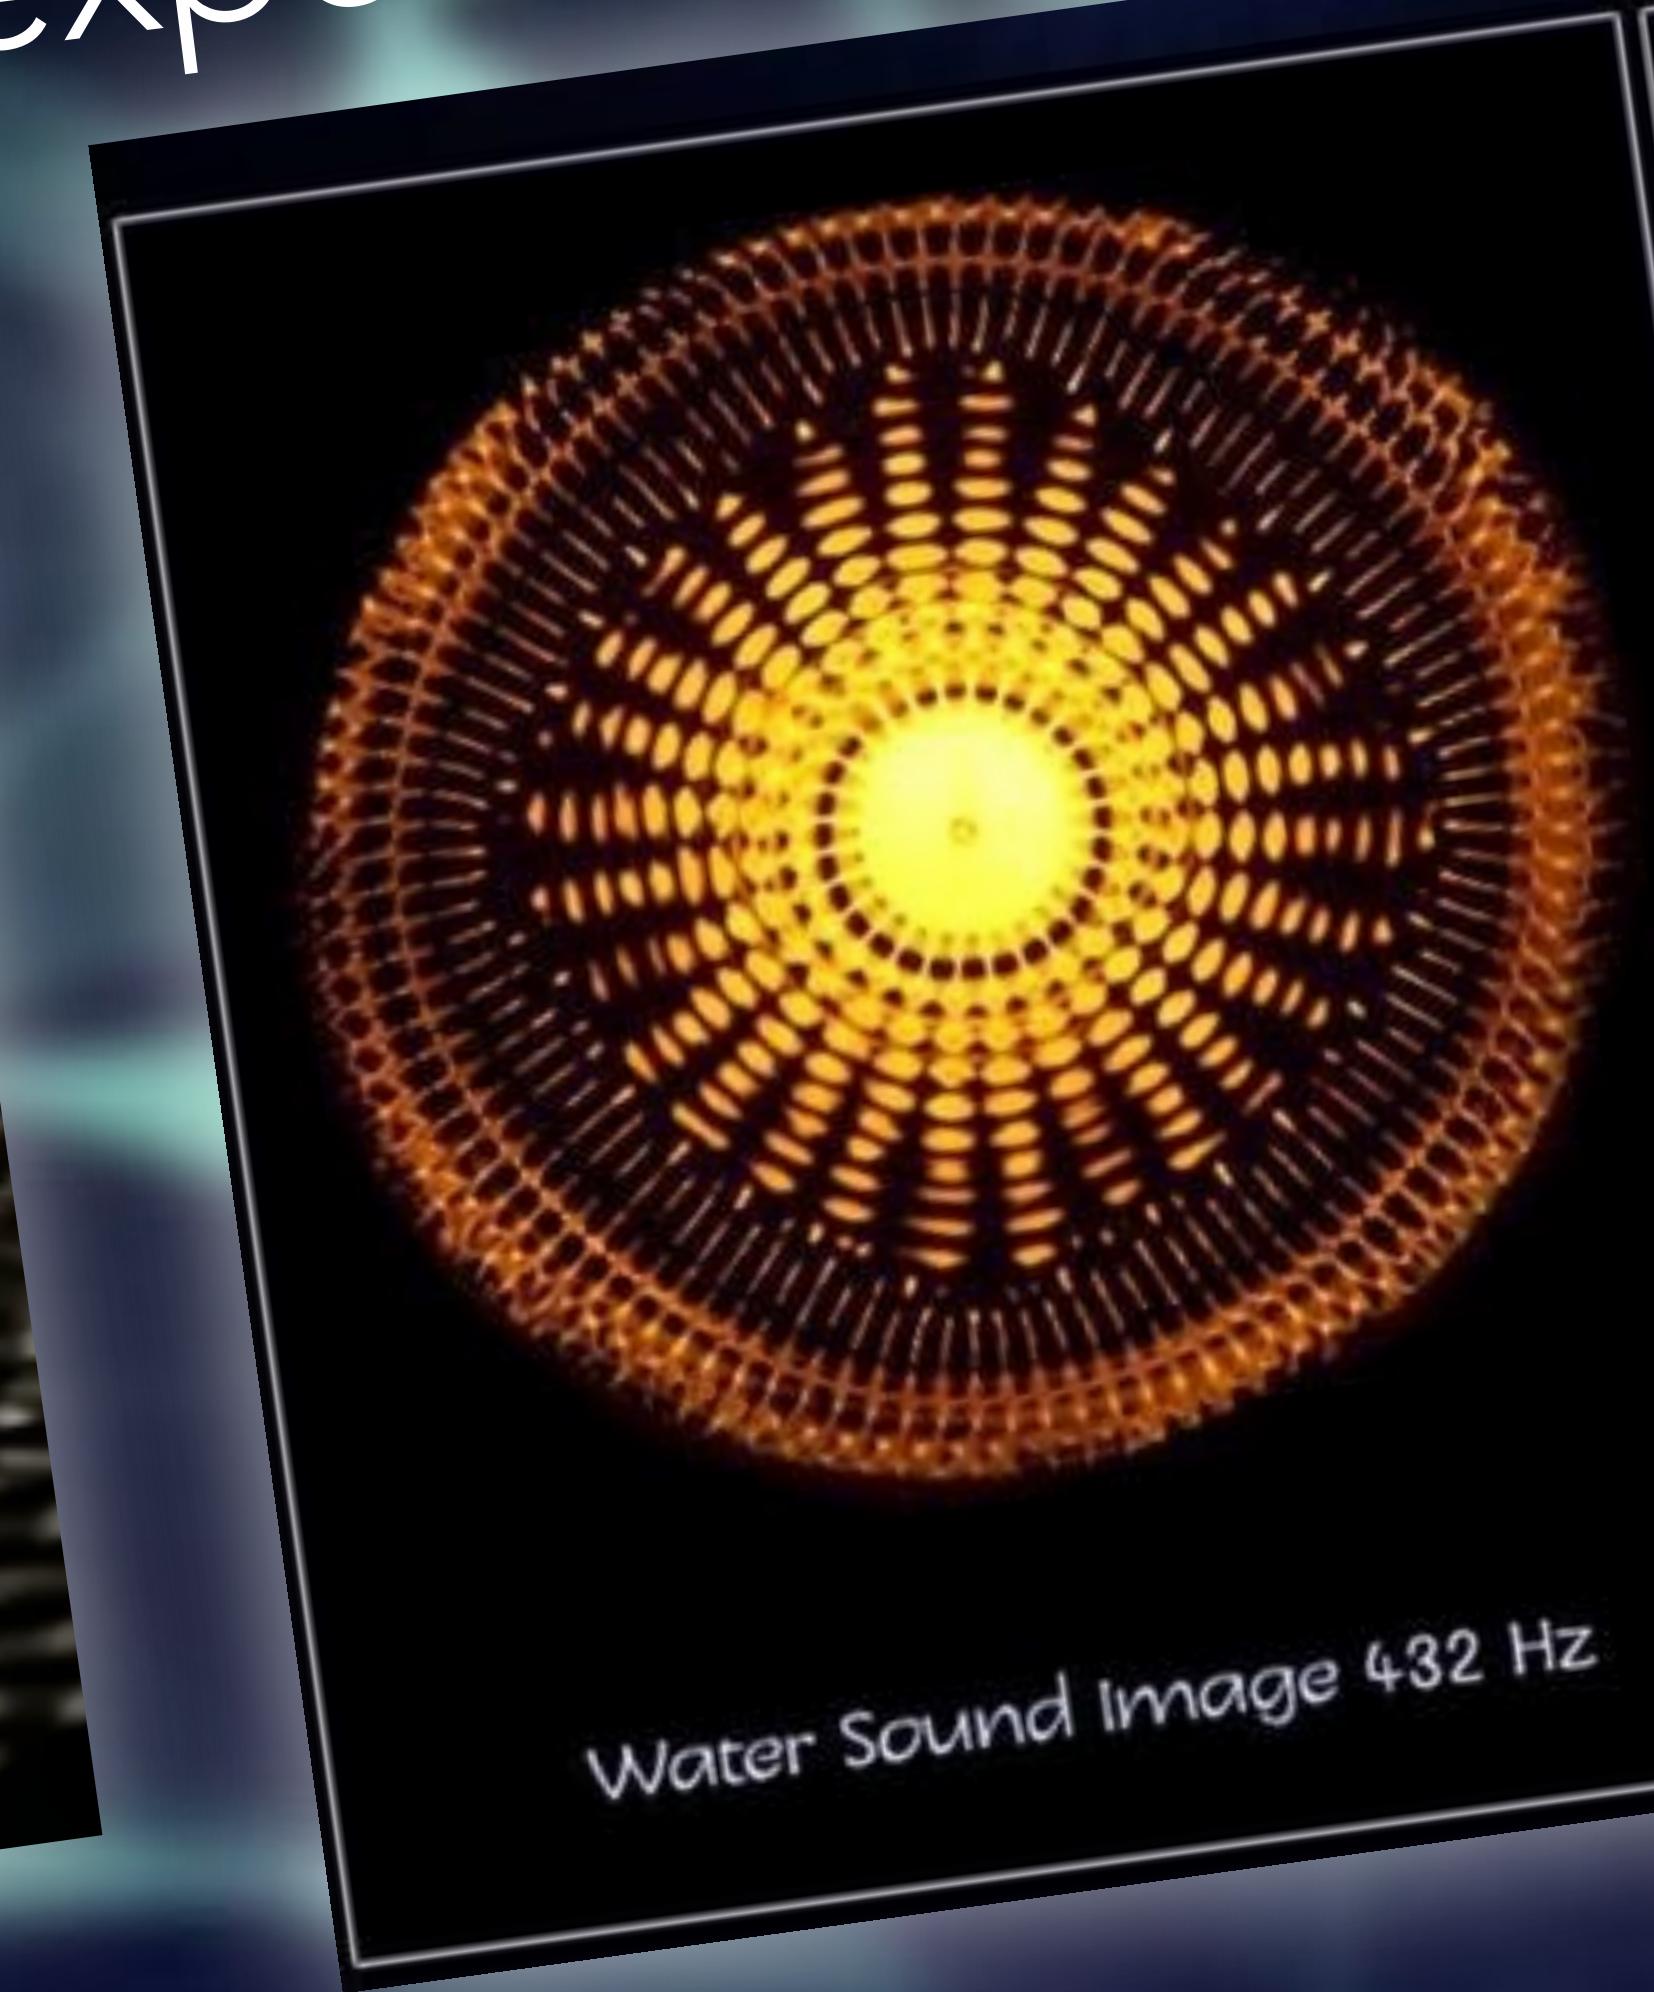

Our *heart beat* sets the
rhythm of life

Everything Is Vibration

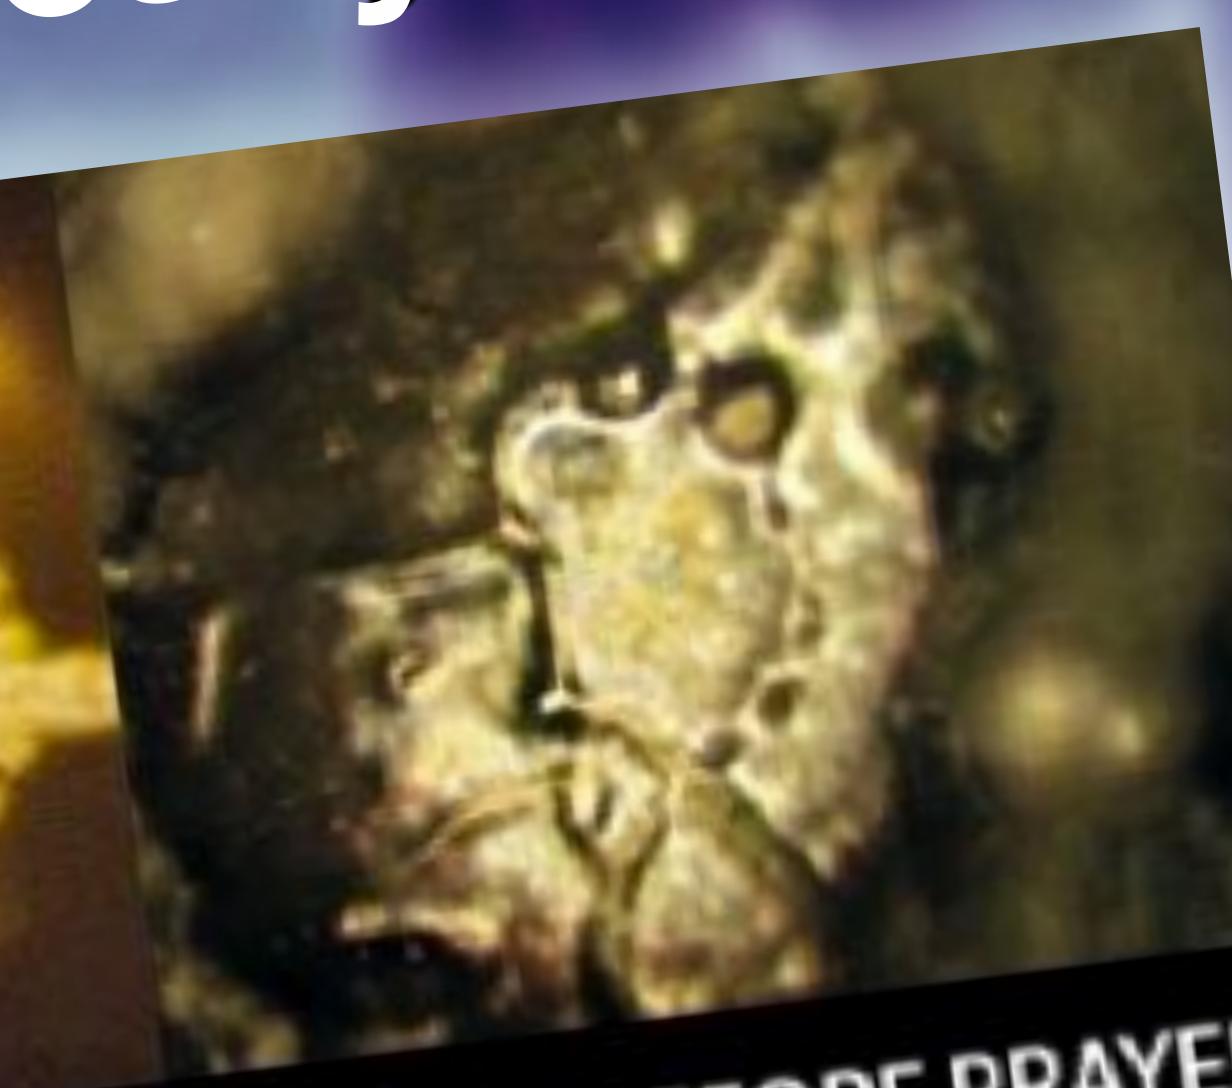

SOUND FORMS MATTER

Sound is made visible in Heart Beat's own CYMATICS experiments

Dr. Emoto's scientific discoveries show us that...

Our thoughts, words, music and intentions can affect the molecular structure of water and we are mostly made of water.

Music

lowers our heart rate
alleviates alzheimer's, dementia, & ptsd
relieves anxiety and depression
sharpens awareness, memory & cognition
increases dopamine production in the brain
can shatter cancer cells with oscillating frequencies
brings people & communities together
improves our overall health & wellness

is medicine

Meet The Director

Michael Boidy

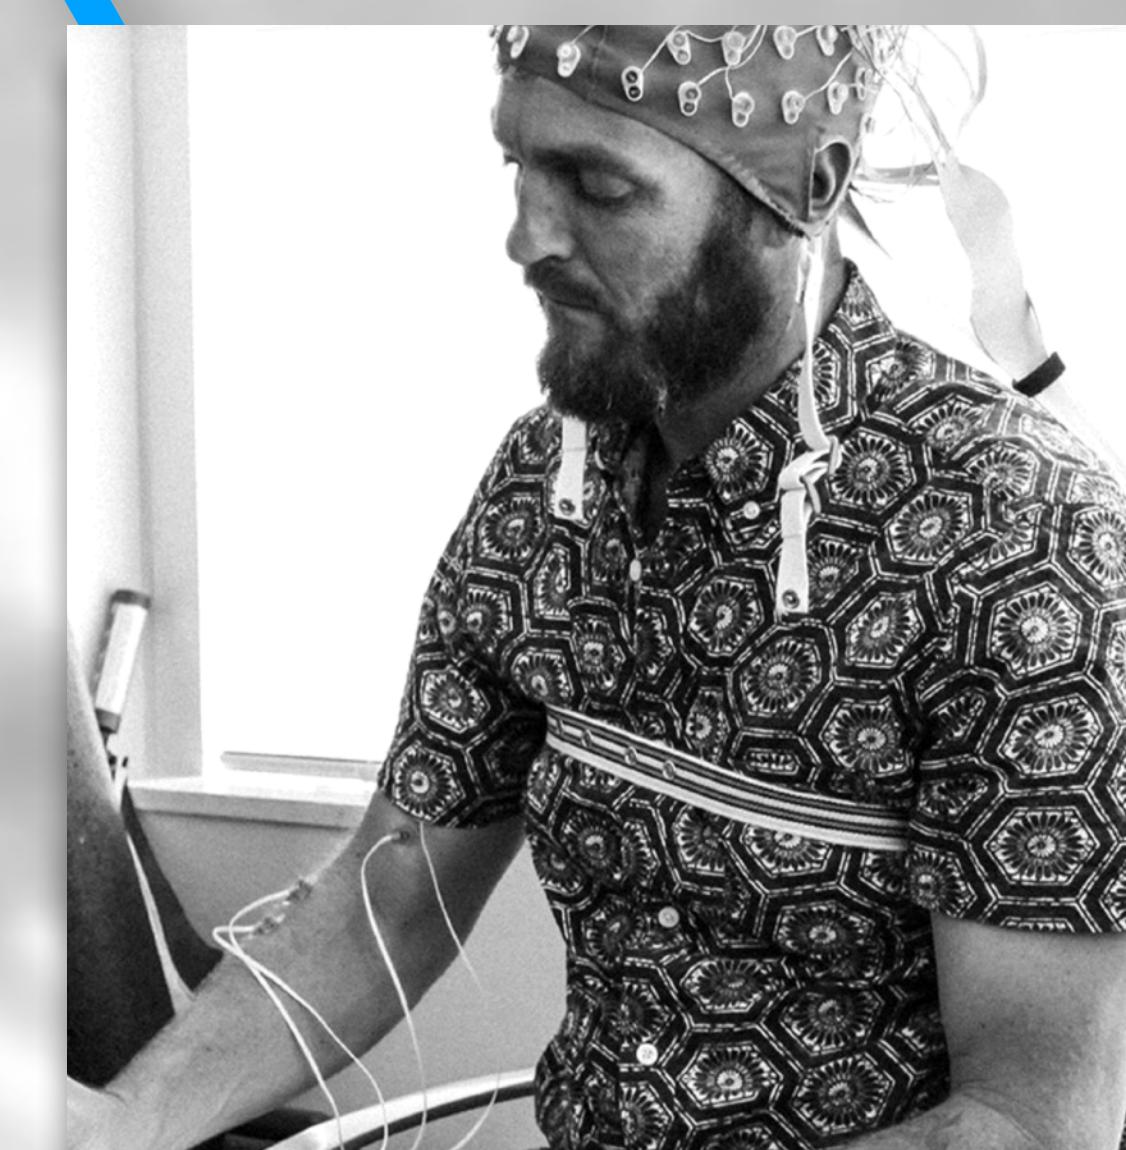

After a near-death experience from a helicopter crash in 2012, Michael discovered a natural source of medicine called music. In a life-changing journey, Michael leveraged the power of music to heal his back and completely alleviate his pain, stiffness and depression just 18 months *after* his crash. Michael's mission is to share this message of healing with the world through this documentary Heart Beat

Survivors

who used the healing power of sound & music
to push through

MICHAEL BOIDY
Survived near-death
Helicopter crash

DEVIN MCCLERNAN
Dystonia survivor who uses deep brain
stimulation & vibroacoustic therapy

FELICIA ACCOMAZZO
Survived Stage 4 Cancer

KELLY KELLAM
Survived 2 Near Death Motorcycle
Accidents

SCOTT YO RIDER
Survived Cancer
